

Army Network Centric Operations and Warfare: *Putting Power to the Edge*

LTG Steven W. Boutelle

CIO/G-6

7 October 2003

Evolving IT War Fight: A Changed Paradigm

Yesterday.....

Contiguous
Areas of Operations

Linear Operations

....Tomorrow

Linear Operations

Non-Contiguous
Areas of Operations

Non-Linear Operations

- Area-Centric
- Low Data Demand
- Large Footprint
- Voice Reliant
- LOS Backbone

- Simultaneous Asymmetric Operations
- High Information Demand
- Embedded, Multi-Functional
- Collaboration Reliant
- Ubiquitous Transport

Driving the C4 Evolution

Emerging Strategic Environment

- Enhanced Nationalism & Rejection of the West
- Ungoverned groups - terrorism
- Readily available information technology
- Technological acceleration
- Unstable power balances

Information Age (R)evolution

Just Cause

Provide Comfort

From 1989-1999, there were 38 US military deploymentsabout once every 14 weeks

Allied Force

“The two truly transforming things, conceivably, might be in information technology and information operation and networking and connecting things in ways that they function totally differently than they had previously.” - Secretary Rumsfeld, Aug 2001

Network-Centric Information Advantage

Information Quality

- Content
- Accuracy
- Timeliness
- Relevance

Local Regional Global

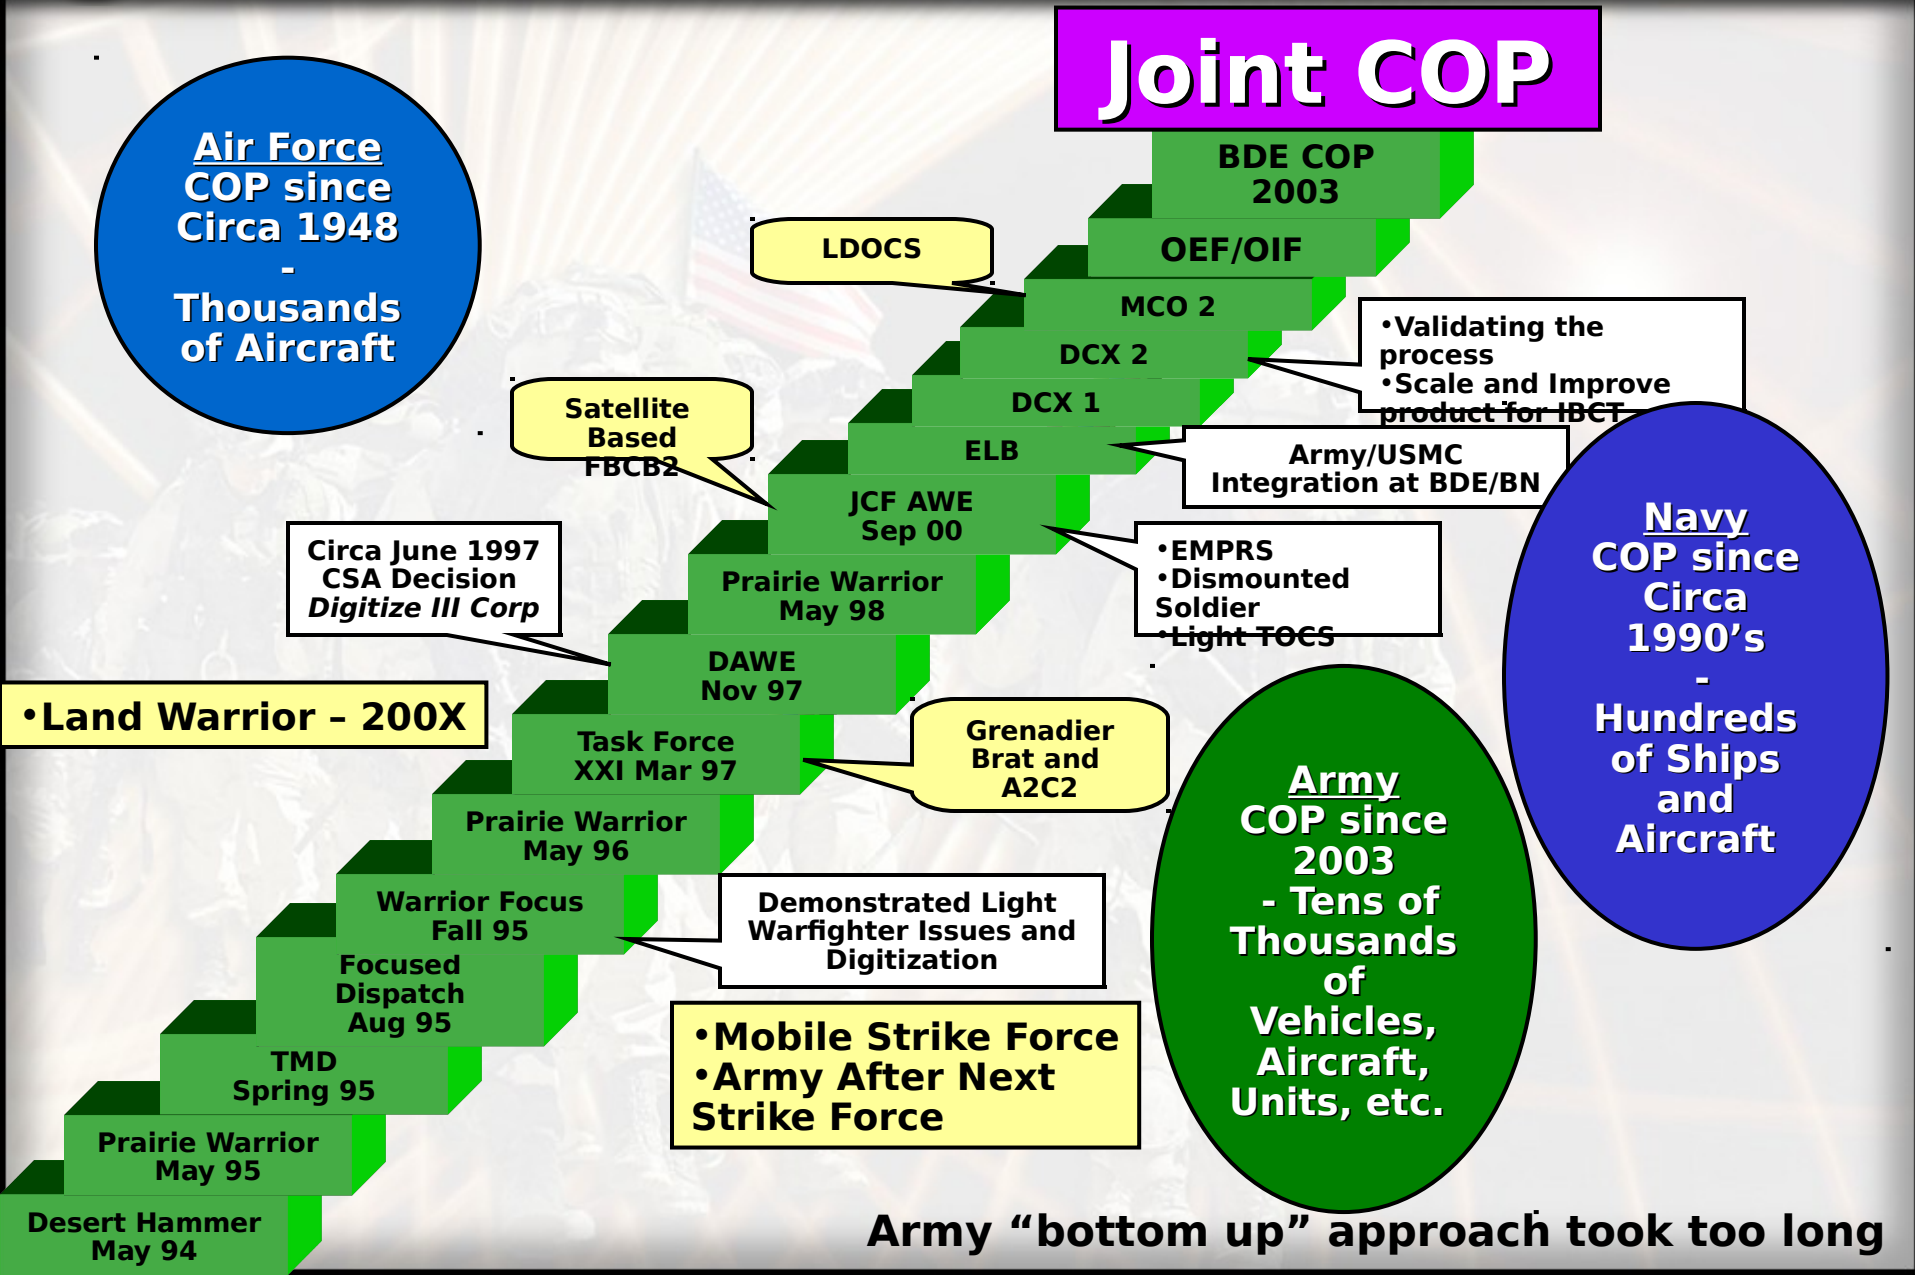

**Network Centric Operations
The Way Ahead**

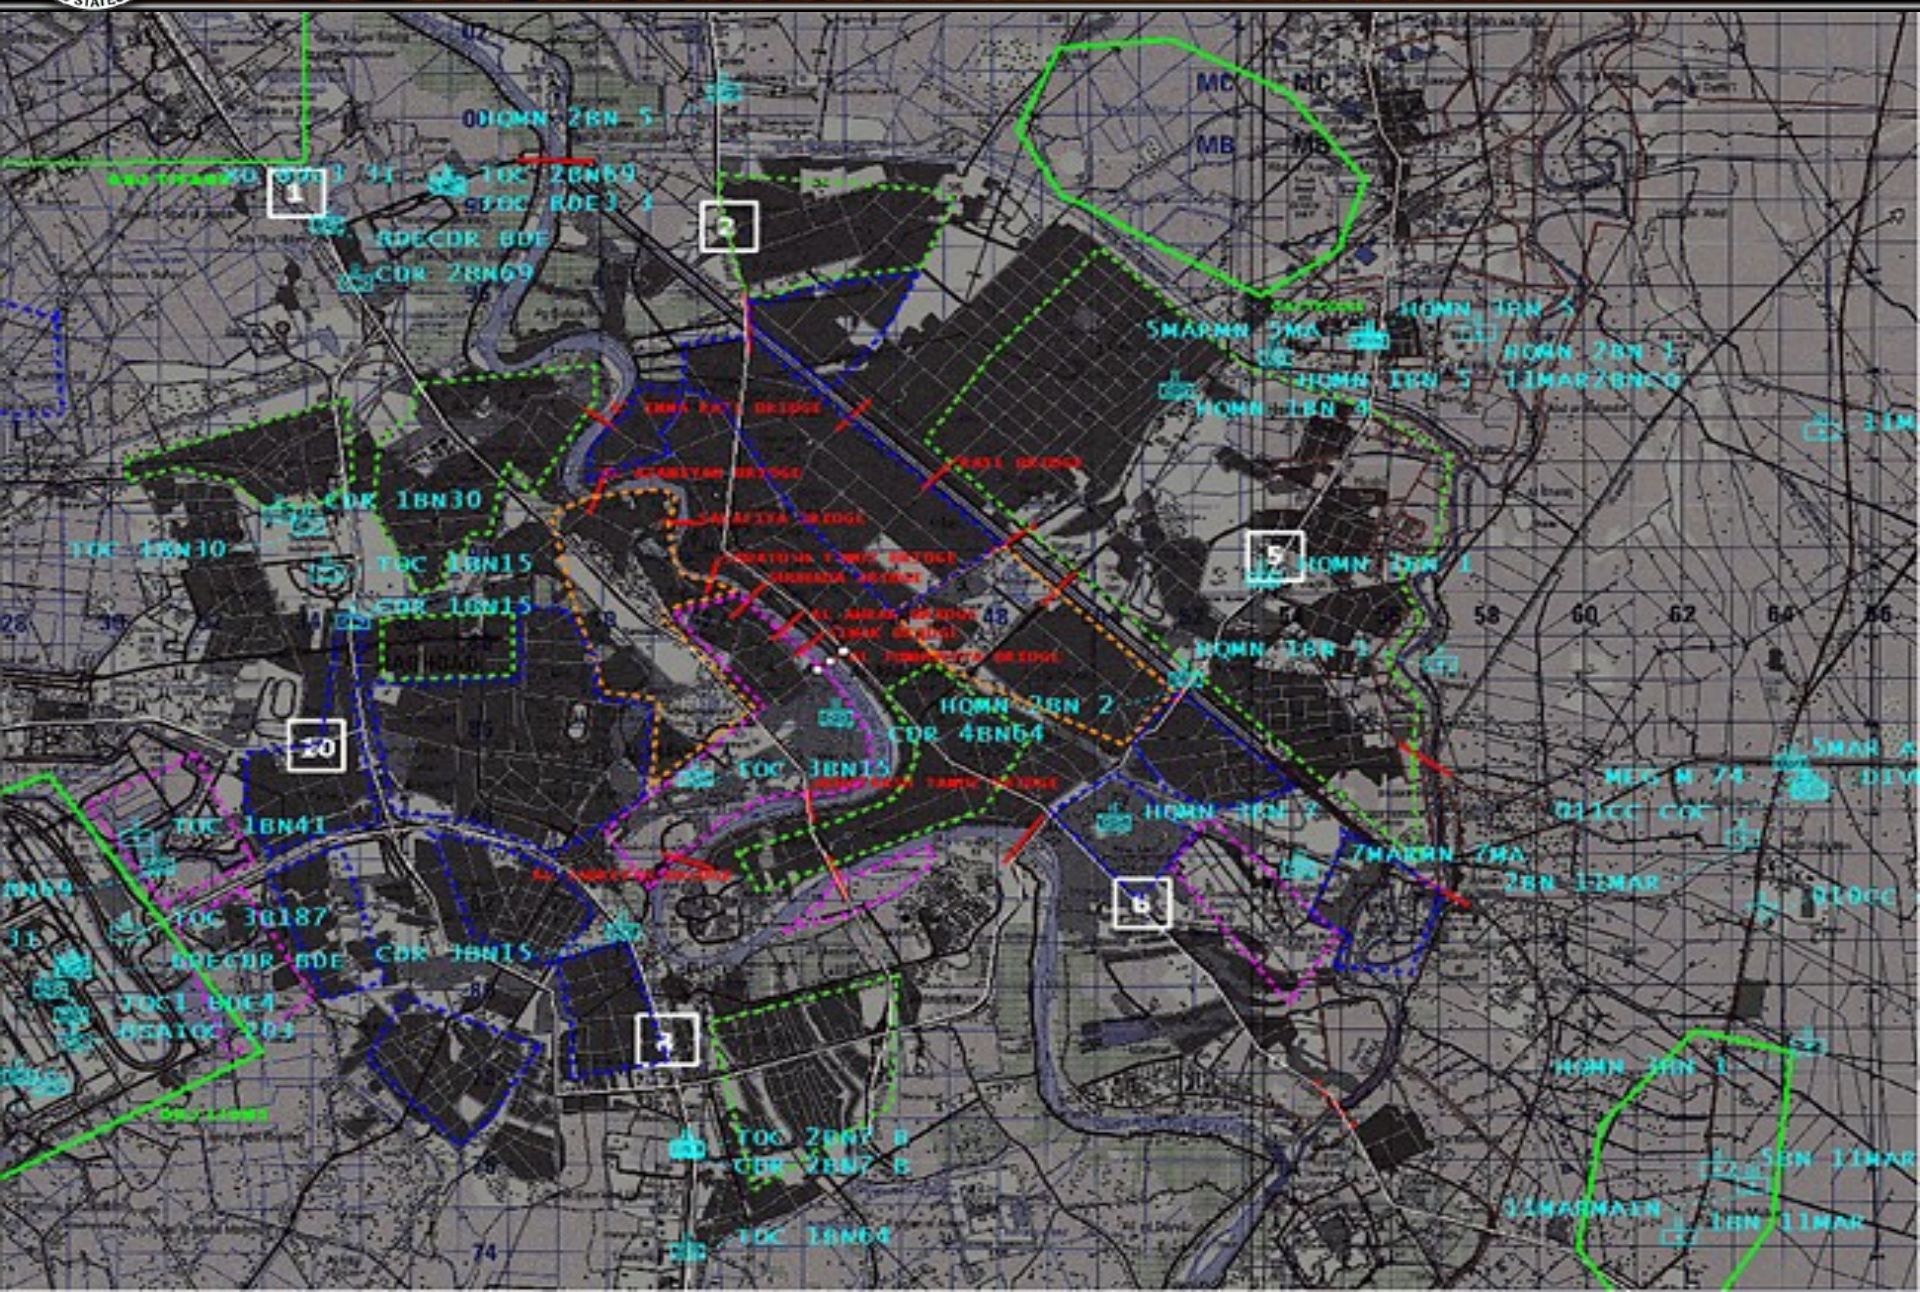

Exploiting Lessons Learned

**Air Force
COP since
Circa 1948
-
Thousands
of Aircraft**

Joint COP

Blue Force Tracking

Power of Network Centric Warfare

Blue Force Tracking: *Part of the Network Centric Warfare Future*

101st Airborne -

101st MI Officer: *"BFT is saving our butts over here, comms-wise!"*

USMC -

USMC Division Forward Senior Watch Officer: *"Had it not been for BFT, we probably would have fired upon a friendly 3ID unit"*

CDR, TSG, USMC: *"We would die without this system"*

82nd Airborne -

1st BDE XO: *"FBCB2 is a winner! When all other means of communications failed, FBCB2 carried the day"*

3rd Infantry Division -

Night Shift Operations Officer, DMAIN: *"At the DMAIN on the move, FBCB2 was the only thing we had for SA"*

CIO/G-6 Imperatives

- ★ **Reshape Signal Units**
 - Reshape people & equipment for relevancy
 - Joint Data Packages (eg. JCSE, SCAMPI)
 - Include satellite plan
 - Plan to “fix” tactical units for 5-7 years like OIF
- ★ **Manage the Army’s GIG contribution as an Enterprise: GuardNet (3300 Sites), ARNet (940 Sites), and Army Networks**
 - Realign and optimize for the Joint Warfighter
- ★ **Network the Force, including Logistics**
- ★ **Affect the acquisition of C4, empower AAIC for acquisition to ensure systems are Joint from birth**
- ★ **Embrace small unit operations**

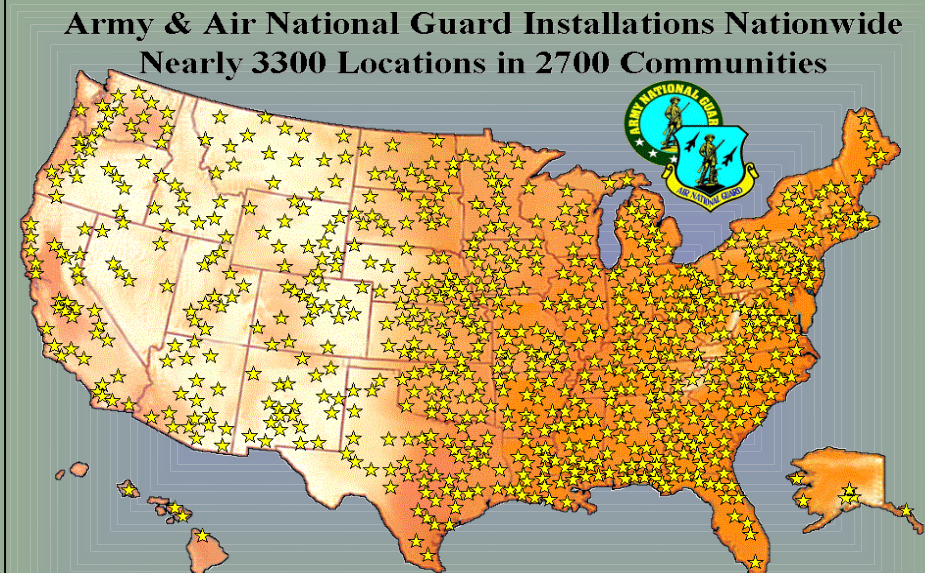

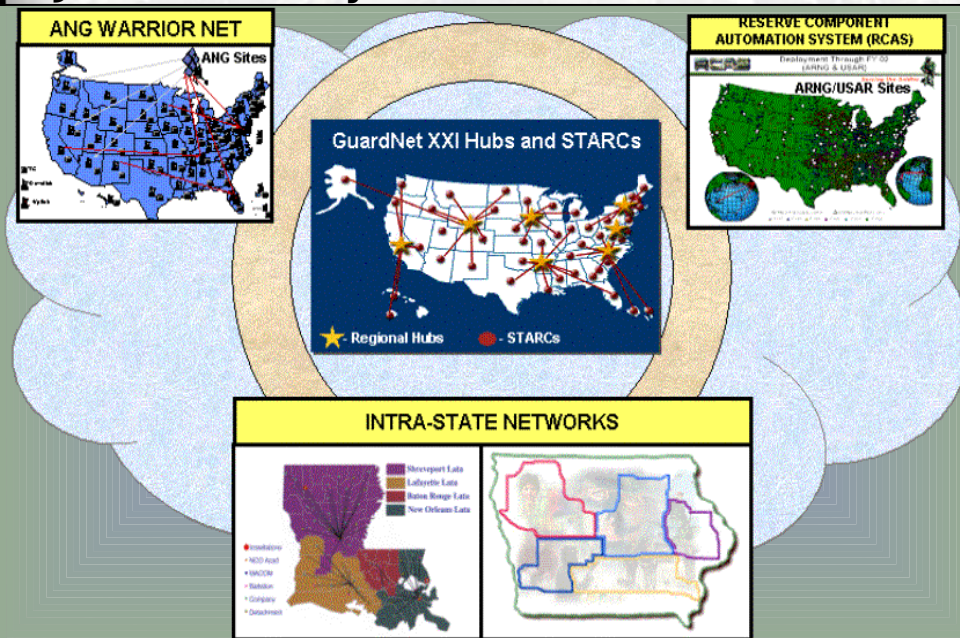

We will sustain/increase momentum with AKM and Current Operations

Army Network Consolidation

- **Network consolidation - Single Enterprise Network**
 - MOAs with USAR and NGB - one Army Enterprise Network
 - Acquisition and management under one element - NETCOM (Network Enterprise Technology Command)
- **Merged Network Operations Security Centers (NOSCs) - NGB, USAR, and NETCOM - one multi-component network management construct**
 - Positions Army to support HLS

June 03 - Army CIO/G-6 is CIO for USAR

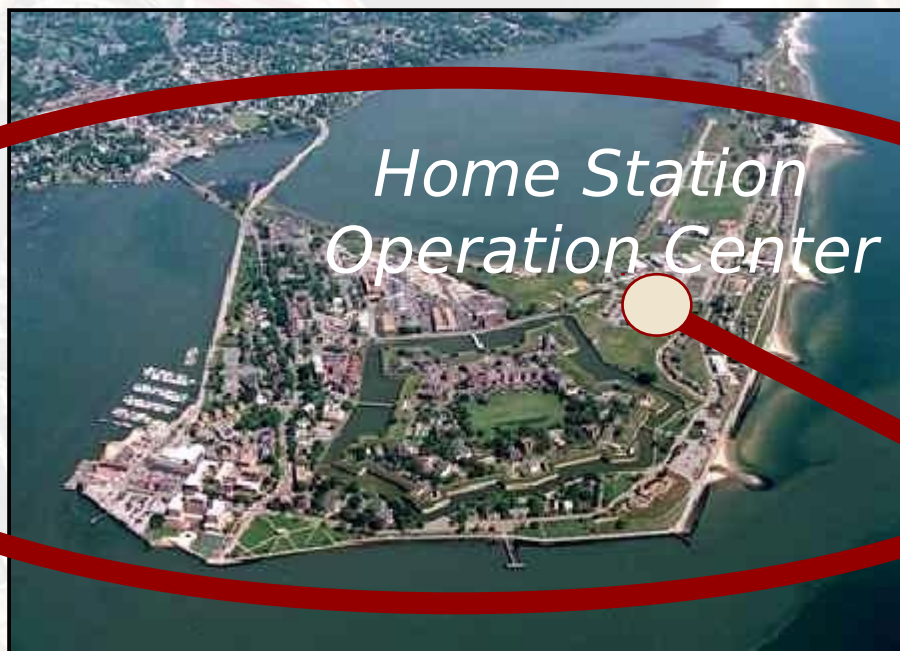

Army's Networks

Today

- Old Copper
- Analog, Aging Switches
- Limited Growth Ability

Installation Information Infrastructure Modernization Program (I3MP)

*Home Station
Operation Center*

2003-2009

- Fiber or New Copper
- Latest Digital Switches
- Latest network equipment for high-speed data
- Upgrade Gateways to DISN/GIG-BE

**Funding:
\$2.8B
(Army)**

- Refining HSOC role with TRADOC
- I3MP locations being realigned
- Locations looked at WRT GIG-BE
- Today, only selected Buildings on selected installations

***We must fix the Last
Mile to the
Installation***

**Locations:
All Army installations
including ARNG and
Army Reserve**

Enablers for the Future Force

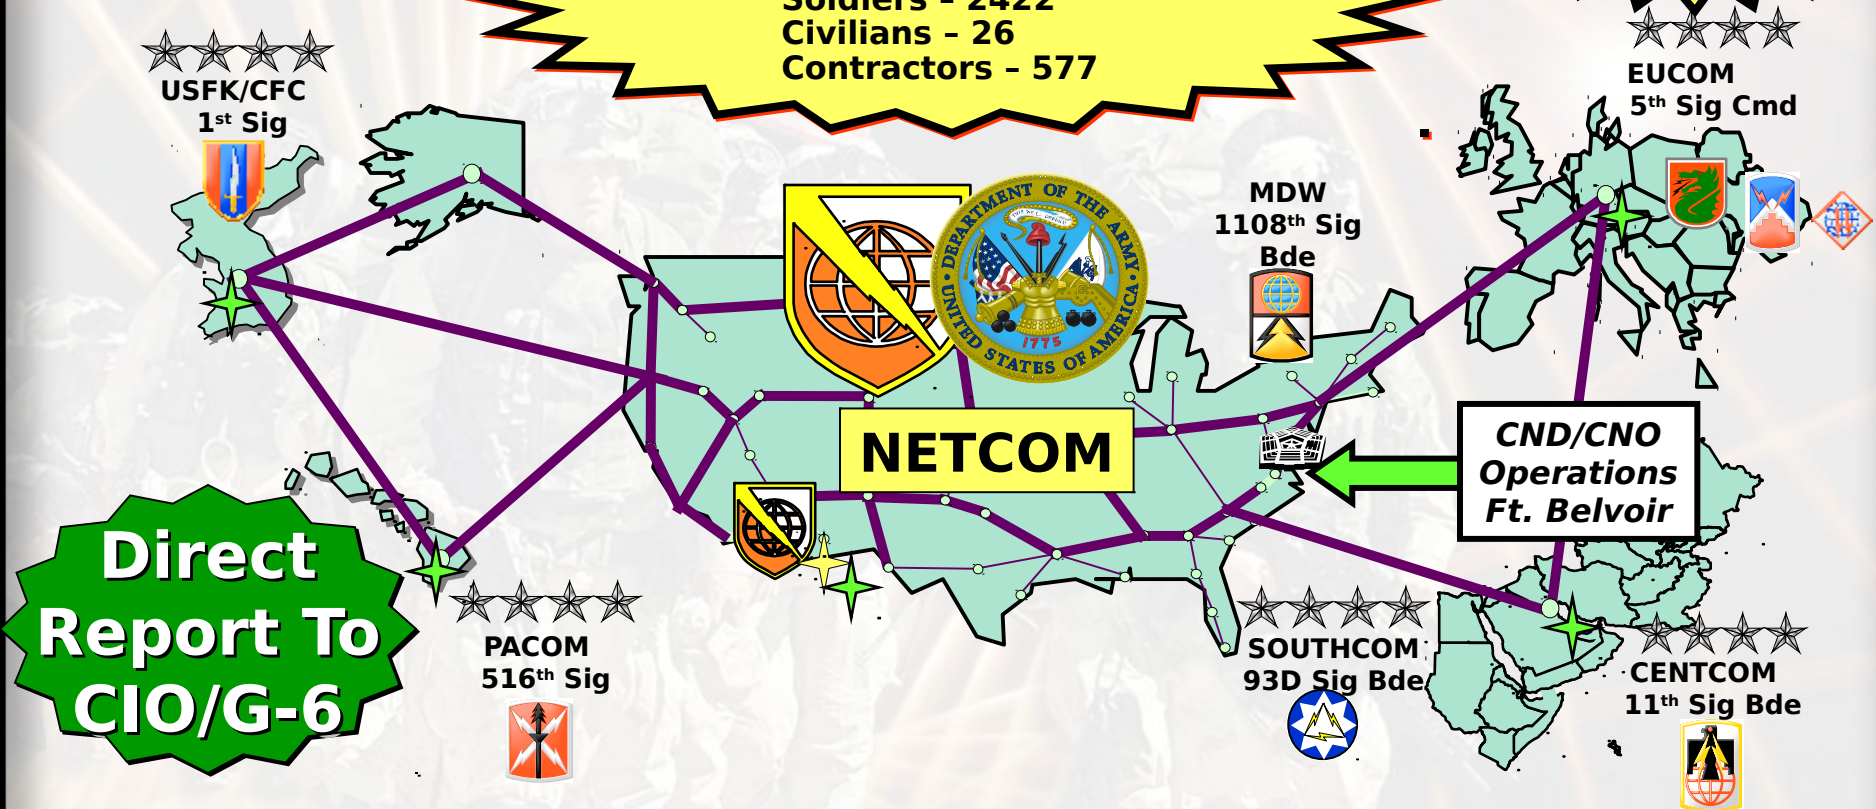

Network Enterprise Technology Command (NETCOM)

**14,000
Soldiers/Civilians
And Contractors**

Supporting the Warfighter

**Currently Deployed In 21 Countries
43 countries since 2002:
Soldiers - 2422
Civilians - 26
Contractors - 577**

**Daily operations
- 300 Facilities
In 14 Countries
Worldwide**

**Direct
Report To
CIO/G-6**

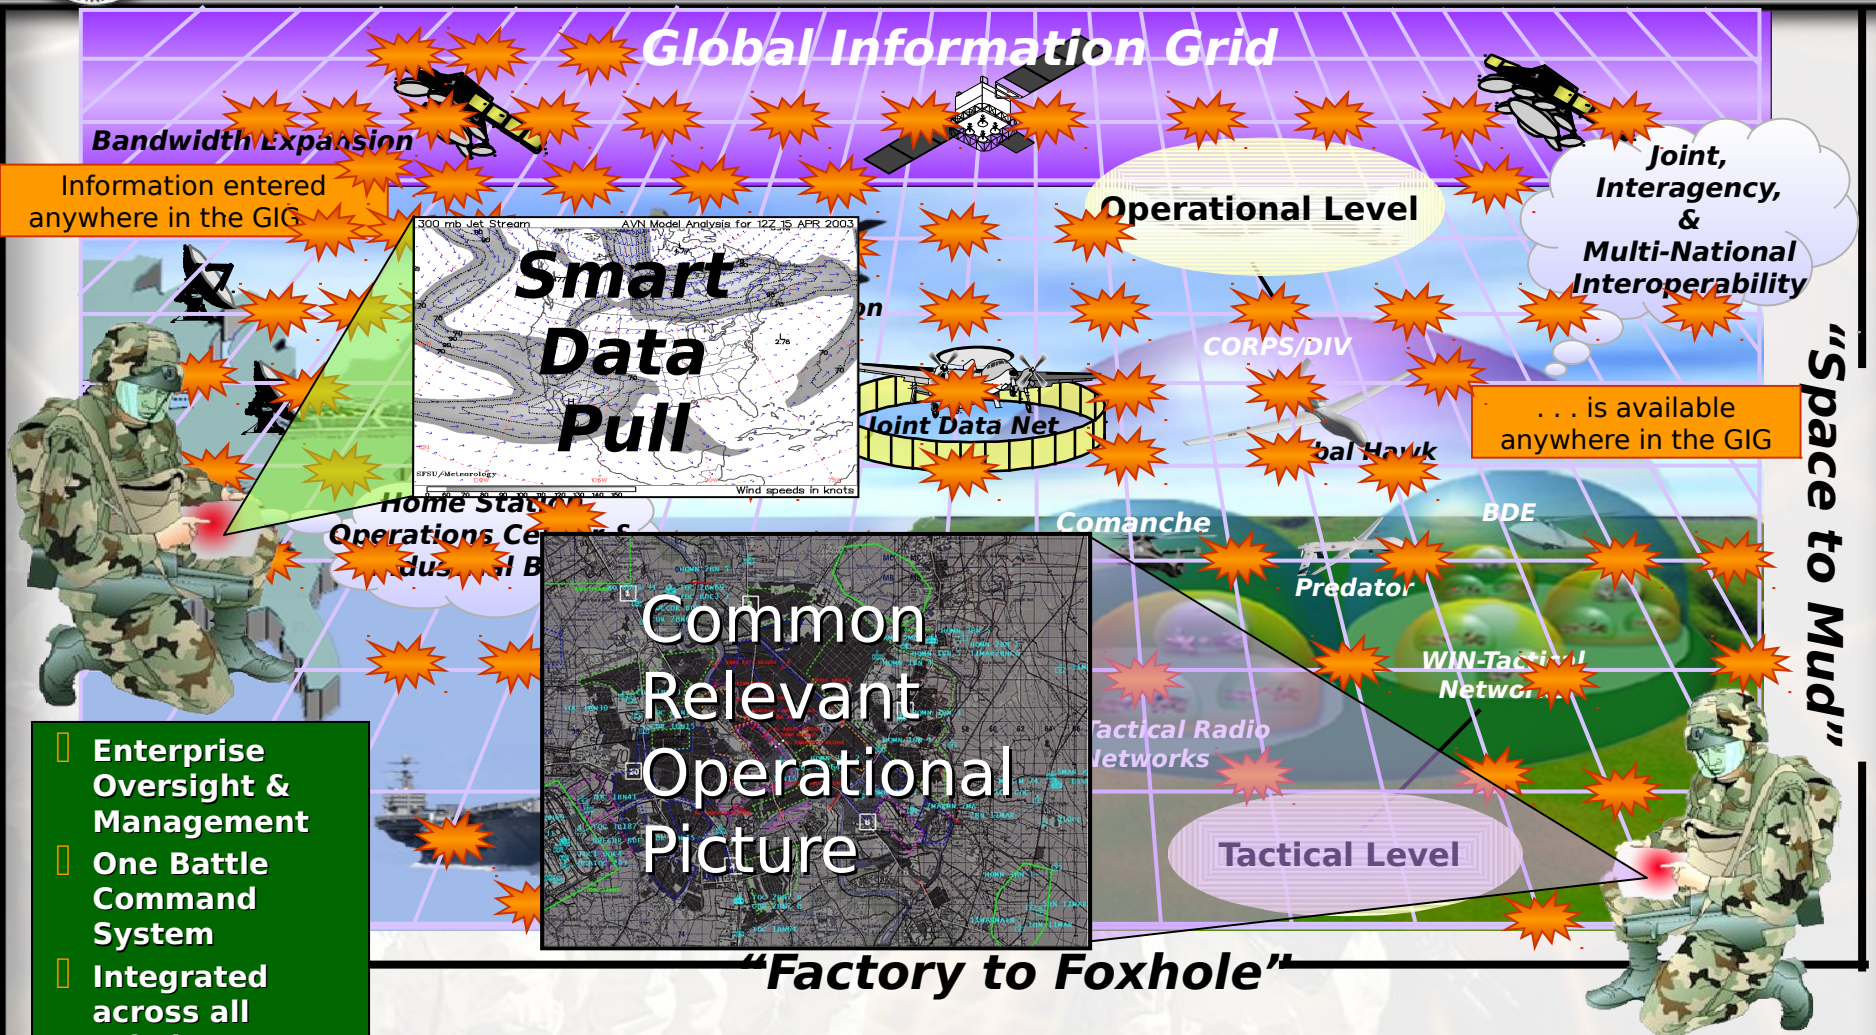

Single authority to operate, manage, and protect Army's Infostructure

Supporting Combatant Commanders World Wide

Fighting & Defending Army Networks from Home Station to Foxhole

Future Force C4 Operational Concept

- Enterprise Oversight & Management
- One Battle Command System
- Integrated across all echelons
- Virtual Collaboration
- Reduce IT footprint
- Enterprise Knowledge

The Objective Force C4 architecture provides the framework for vertical & horizontal integration, specifies interfaces and relationships internal and external to the Army... Joint, Interagency, and Multi-National

This is Not Just About Technology

Global Terrorist Incidents

1968-1997 = 8509 (20 Years)

1997-2003 = 7053 (6 Years)

- Al Qaida
- Islamic Jihad
- Hamas
- Hisbollah
- Palestine Liberation Front
- Etc., Etc.

• Trained and
Eduated - Phd's,
Engineers,
technicians
• Highly
Dedicated

Threat Level = **HIGH**

OCT 23, 1983

Marine Barracks

241 Marines killed

Aug 7 1998
U.S. Embassies
In East Africa
54 killed
5000 Injured

Oct 12, 2000
USS Cole
17 Sailors killed
39 Injured

Sept 11, 2001
WTC/Pentagon
3000+ killed
thousands more

335 Terrorist Attacks
Worldwide Since 9-11
